

## ACNE

### The Stellar M22 Acne Solution

This treatment enables your Certified Advanced Esthetician to greatly improve your skin appearance and reduce your acne, while also treating skin redness and pigmentation. The unique IPL technology on the Stellar M22 system applies light flashes over the treated area, triggering a response that will eventually eliminate the bacteria within the pores. The Stellar M22 system offers a non-invasive solution for inflammatory acne and offers a great alternative for oral medication.

## HAIR REDUCTION

### The Stellar M22 IPL Hair Reduction

This treatment is a non-invasive treatment that reduces hair growth, resulting in smooth, beautiful skin. Our unique IPL (Intense Pulsed Light) technology targets the hair follicles, and impairs their ability to grow hair. IPL hair removal is effective on black and brown hair. Highly controlled pulses of light are applied on the treated area and are selectively absorbed by the hair follicles beneath the skin surface. The absorbed light heats the hair follicles, which damages the re-growth potential of the follicle – all without damaging the surrounding tissue.

## INTENSE PULSED LIGHT

### The Stellar M22 Photo Facial and Rejuvenation Treatment

#### Photo rejuvenation technology

The IPL (Intense Pulsed Light) technology allows treatment of pigmentation and vascular imperfections, while improving overall skin appearance. Stellar M22 IPL with Optimal Pulse Technology (OPTTM) enables your Certified Advanced Esthetician to customize the treatment according to your skin type and desired results, with maximum safety. Light pulses penetrate the tissue and create heat, targeting the skin imperfection in a controlled manner. The body's natural process then removes the treated tissue, while collagen and elastic fiber stimulation occurs, resulting in a visible improvement in skin tone and overall appearance.

This treatment enables your Certified Advanced Esthetician to offer you remarkable results on a range of skin concerns such as:

- Pigmentation
- Age/sun spots
- Broken capillaries and rosacea
- Overall skin appearance by stimulating collagen and elastic fiber production

## FRACTIONAL LASER

### The ResurFX Fractional Laser

This is a state-of-the-art, non-ablative, skin resurfacing technology. ResurFX fractional laser stimulates the production of new collagen and elastic fibers in the deeper layers of the skin. Stimulating new collagen production is the key to a more radiant, youthful looking skin. The ResurFX technology enables your Certified Advanced Esthetician to achieve excellent clinical results over a sequence of treatments while keeping your comfort maximal and downtime minimal. An optimally tailored treatment that addresses the early signs of aging, **for noticeable results with fine lines, skin texture and overall skin appearance** – all in a “lunch-time” treatment, so that you can return to your busy lifestyle.

## PHOTO FRACTIONAL

### The Stellar M22 PhotoFractional treatment

This treatment is a complete skin rejuvenation solution, enabling your Certified Advanced Esthetician to offer you remarkable results on a range of skin aging concerns such as age and sun spots, fine lines, acne scars, uneven texture and skin tone. Our unique rejuvenation technology combines two solutions, IPL (Intense Pulsed Light) and ResurFX non-ablative skin resurfacing, so that both skin tone and texture can be treated sequentially. By combining both IPL and ResurFX technologies in the same treatment session, both skin pigmentation and texture can be treated at the same time. Stellar M22 IPL technology removes both unwanted pigmentation and blood vessels from the skin, while the ResurFX fractional laser stimulates the production of new collagen and elastic fibers in the deeper layers of the skin. Stimulating new collagen production is the key to a more radiant, youthful looking skin. To ensure utmost comfort, your Certified Advanced Esthetician will apply a topical numbing cream before treatment. You may experience a warm or prickling sensation as the laser is applied to the skin, but the treatment is gentle and should not feel uncomfortable.
